

Pat Fisher

I worked in an accounting environment all my working life. For ten years of that time I was a volunteer for the East Surrey branch of the Motor Neurone Disease Society. I was involved with fund raising, catering and was also treasurer for three years.

In 2003 I had an operation and whilst I was on sick leave I saw an advert in our local paper for a "Develop your Spirituality" group. So I went along and found it all very interesting. It covered "Hands on Healing" and the lady I was working with said to me "your hands are like hot irons on my body".

My intention was to work in a hospice or hospital and to be able to do this you must be insured and trained by a reputable organisation. That made me think of doing a course with The National Federation of Spiritual Healers (NFSH, now called The Healing Trust) and I joined as a Student Member in 2006.

I spent two and quarter years training, then going before the Panel and passed to be a Full Healer. I was a member of The Healing Trust Region 1 Committee and was Chair for a short time.

I was then approached by Walton Healing Centre and asked if I could stand in for a lady while she was away on a 6 week holiday, the rest is history as they say! I am still there and I am currently the Chair of the Walton Healing Centre. I love what I do and have met so many interesting people.

When I started my healer journey I also developed an interest in pendulum dowsing as well as becoming a Geopathic-Electromagnetic Stress and underground stream healer.

I was one of the founder members of the Holistic Energy Association joining on January 1st 2012.
